

30 September 2016

To Whom It May Concern,

The purpose of this letter is to verify that Dr Poonam Bajaj spent a period of time in my Balance Disorders Laboratory at Oregon Health & Science University in Portland, OR. She was here from September 18<sup>th</sup> to September 30<sup>th</sup> 2016. During this visit, in addition to attending the World Parkinson Congress and the Pre-conference workshop that I organized, Dr Bajaj met with my research team members as well as faculty in Rehabilitation and the OHSU Parkinson Center. She was also able to observe ongoing research projects and attend our Movement Disorders seminar.

Sincerely,

A handwritten signature in black ink that reads "Jay B Horak". The signature is written in a cursive, flowing style.

PhD, PT  
Professor of Neurology
